

# FootballFerrule®

The next generation in single-mode or multimode multi-fiber optical interconnects.

Significantly smaller size; fits within pins of polymer ferrule

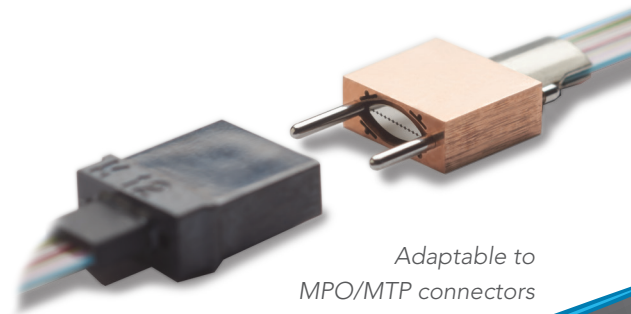

Available in four and twelve channel

- » No precision-machined guide pins
- » Precision outer diameter and position of fibers
- » Single-mode optical performance
- » Fiber holding "hole" diameter same as that of fiber
- » Laser-polishable fiber end face
- » Significantly better environmental performance
- » Potential field installation

Fits within many standard connector housings (e.g., FC, ST, SC, 38999 back shells)

Adaptable to MPO/MTP connectors
